VCI CORROSION PROTECTION

Rayzor Industrial Packaging Pvt Ltd is the pioneer in crafting tailor-made VCI Film Rolls under the brand name RUSTOXY. Our state-of-the-art manufacturing facilities in Madurai, Tamilnadu, India, enable us to produce high-quality film rolls that offer impeccable corrosion protection for a myriad of applications. With a focus on regional production and flexibility, our VCI Film Rolls stand as a testament to over 20 years of commitment to reliable premium quality.

Our VCI Film Rolls actively shield your equipment against corrosion, providing a durable protective layer that eliminates the need for additional measures such as oiling or waxing. Trust Rayzor Industrial Packaging for VCI Film Rolls that ensure your products reach their destination in a corrosion-free state, saving you time and money.

How does VCI corrosion protection work? The active chemical in a VCI is embedded in the carrier using special techniques. Once the protective atmosphere has been formed inside the packaging, VCI molecules are deposited on the metal surfaces of the packaged goods, including difficult to reach areas such as recesses, borings, threads, creases and the like.

The surface layer thus formed disrupts the chemical and electrochemical reactions that provoke corrosion. When VCI packaging is opened, the VCI film vaporizes without leaving any

VCI FILM ROLL

VCI FILM POUCH

VCI FILM SHEET

VCI FILM BAG

VCI FILM SPECIFICATION

VCI films Specification :

In thicknesses ranging from 50 to 200 μ ,

Film Width :

Roll / Sheet : 3000mm

As flat sheet films (supplied in rolls or sheets)

Tube : 1500mm

As tubular films.

Depending on the size of your product We always have a wide range of bags on stock. For covering or packaging larger products such as motors, you can use one of the following items:

Side gusset bags : can be used as box inserts ü for bulk items ü large filling volume also available as perforated bags on a roll

Box covers with bottom sheet : ideal for heavy and bulky goods easy to handle: just cover your goods and seal the edges of your tailored packaging product.

Box inserts : ideal for filling and loading operations ü easy to seal thanks to horizontal seam (stretch closure)

POLYETHYLENE (LD-PE) FILMS

Polyethylene (LD-PE) films are very versatile. Combined with desiccants, they provide basic protection against moisture and corrosion over shorter periods of time as transport and storage packaging.

FILM:

protection against dust, dirt & spray water basic corrosion protection only for short time periods and transport routes

LDPE FILM ROLL

LDPE FILM POUCH

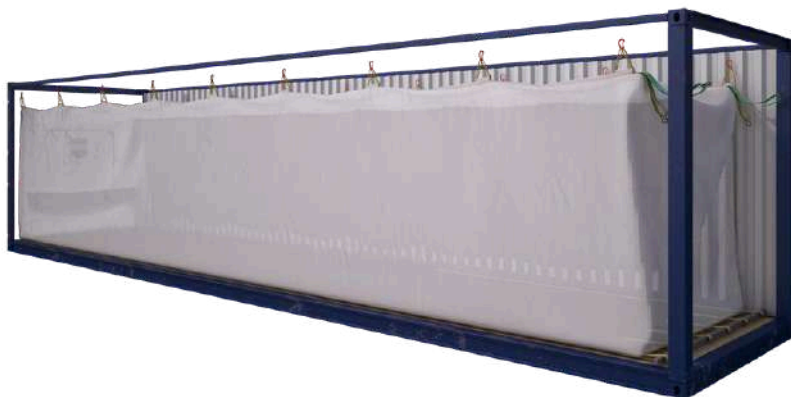

COVERS & LINERS :

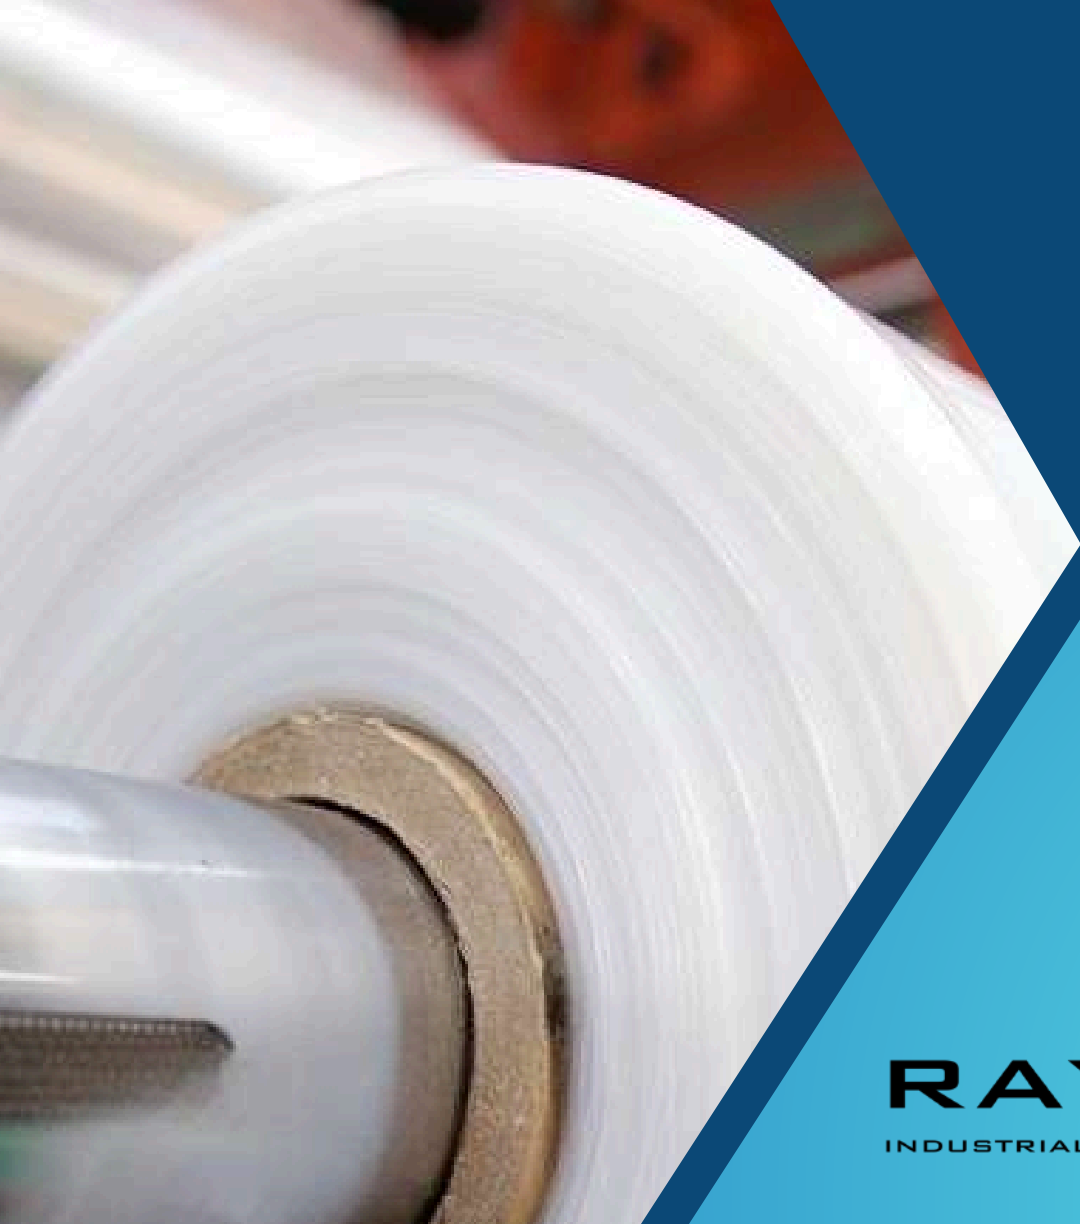

For parts, bulk material, machinery, switch cabinets, devices, plant technology, heavy and bulky industrial goods

LDPE PALLET COVER

LDPE CONTAINER LINER
